- Pictures submitted under Open Color, Open Monochrome, Nature and Photo Travel must follow the below definitions.

### **COLOUR** – F.I.A.P. Definition

- Any photograph that is not monochrome. It includes a monochrome photograph that has been partially toned or had colour added.

### **NATURE** – F.I.A.P. Definition

- Nature photography depicts living, untamed animals and uncultivated plants in a natural habitat, geology and the wide diversity of natural phenomena, from insects to icebergs. Photographs of animals that are domesticated, caged or under any form of restraint, as well as photographs of cultivated plants are ineligible. Minimal evidence of humans is acceptable for nature subjects, such as barn owls or storks, adapting to an environment modified by humans, or natural forces, like hurricanes or tidal waves, reclaiming it. The original image must have been taken by the photographer, whatever photographic medium is used. Any manipulation or modification to the original image is limited to minor retouching of blemishes and must not alter the content of the original scene. After satisfying the above requirements, every effort should be made to ensure the highest level of artistic skill in all nature photographs.

### **FIAP - MONOCHROME**

A black and white work fitting from the very dark grey (black) to the very clear grey (white) is a monochrome work with the various shades of grey.

A black and white work toned entirely in a single color will remain a monochrome work able to stand in the black and white category; such a work can be reproduced in black and white in the catalog.

On the other hand a black and white work modified by partial toning or by the addition of one color becomes a color work (polychrome) to stand in the color category; such a work requires color reproduction in the catalog.
